

## Tea tree oil

Tea tree oil is a great all purpose essential oil. The Tea Tree Oil Bible gives you and your doctor or health care practitioner as much information as possible in a clear, simple and concise manner.

What got us interested in tea tree oil were the many successful personal health and hygiene applications we and others were using on a daily basis. The overwhelming testimonials indicated a little known yet powerful healing agent was being overlooked.

In many cases, people did not have enough information to minimize their efforts and maximize the benefits to themselves. When used properly, tea tree oil can help you save time, energy and money. In essence you can become your own manufacturer and save time, energy and expense by keeping a few key products in your home to use as a base for tea tree oil mixtures, or by boosting the effectiveness of products you are already using by adding a few drops of this powerful essential oil. Many commercially produced tea tree oil products are now being made for consumers.

This explosion of interest started us on a journey of exploration, where we discovered documented studies of the safe and effective uses for this miraculous essential oil. A summary of the research, resources and sources are supplied. This will help your health care professionals in their quest for better and safer ways of delivering your health care needs. This will help you help yourself.

As in all matters of health and well-being, it is your responsibility to find the answers that work best for you. Self-health care is your constitutional right, one which you can exercise on a daily basis.
